
Ljung-Box p-values, reduced form residuals (H0: residuals are white noise)
Δ ln rel. price of investment
Δ ln GDP / hours
Δ ln GDP deflator
Capacity utilisation
ln hours
ln(GDP/hours) - ln real wage
ln consumption / GDP
ln investment / GDP
Federal funds rate
Velocity: ln P + ln GDP - ln MZM
p-value
ACF lag
5% threshold
VAR p = 4
VAR p = 8
VAR p = 12
